Writing Task 1

Answer

The chart shows percentage of using types of transport by tourists in New Zealand in 2004. there are several types of transportation including: Car, Air, Coach and Ferry. British tourists tend to use cars more than others while Japanese use cars less than other tourists and more using Air and Coach transport. German are in second position in using Car then Australian are in third position. Korean are not keen of using Ferry but German are interested in using it more among other tourists. sixty percent is the highest score of report for using one type of transportation (for Car) and almost five percent is the lowest report (for Ferry) among other types of transport. despite Ferry is used limit with Korean, It is used by German more than others. The chart shows that German and British almost are into to using coach both twenty percent. and German and Korean both of them also use the Air twenty five percent. all in all Car transport is more popular than other types of transport.

Writing Task 2**Answer**

It is hard to be black and white about issues. I judge events by considering advantages and disadvantages. actually in grey way.

we can not refuse confronting with modern society. we should be ready and skilled to deal with it.

I think awareness is vital skill that we should consider. one positive charactery that I can mention is about creativity. modern technology gives us more options to access and propose our ideas. we can imagin more details and use them while we dont access in real world. however it can be used for terrible reasons. children are a weak population that can be hurt from wrong informations and they may believe data simply. they have poor critical thinking because of brain development. parents should take care of them, monitoring their activities especialy in using social media. they are responsible to educate them.

but I think modern technology has been bringing us more funny times. and we can not ignore its benefits for business.
